A		x12
B		x4
C		x4

UDC5122

A line drawing of a three-legged stool. The stool has three legs (labeled 4) and a seat (labeled 2). The legs are connected to the seat by a central support structure (labeled 3). A downward arrow indicates the direction of force applied to the seat. Two circular insets provide detailed views: the left inset shows the connection between the seat and the legs, with an arrow pointing to the joint; the right inset shows the connection between the legs and the central support structure, with an arrow pointing to the joint.
